

## **Recombinant Human ADAMTS1 protein, C-His Tag**

## **Product Information**

| Cat               | IMP-3570                                                                                                                                                                                                                                           |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Official Symbol   | ADAMTS1                                                                                                                                                                                                                                            |
| Product Overview  | Recombinant Human ADAMTS1 protein(50-967aa), fused with C-terminal<br>His Tag, was expressed in HEK293.                                                                                                                                            |
| Expression System | HEK293                                                                                                                                                                                                                                             |
| Species           | Human                                                                                                                                                                                                                                              |
| Тад               | C-His Tag                                                                                                                                                                                                                                          |
| Form              | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.                                                                                                                                   |
| Molecular Mass    | The protein has a predicted molecular mass of 101.1 kDa after removal of the signal peptide. The apparent molecular mass of ADAMTS1-His is approximately 100-130 kDa due to glycosylation.                                                         |
| Protein length    | 50-967aa                                                                                                                                                                                                                                           |
| Purity            | The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.                                                                                                                                               |
| Storage           | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).Lyophilized proteins are shipped at ambient temperature. |
| Reconstitution    | It is recommended that sterile water be added to the vial to prepare a stock solution of 0.2 ug/ul. Centrifuge the vial at 4°C before opening to recover the entire contents.                                                                      |

SDS-PAGE
